Top Reasons to use CryptoHeaven Secure Email

High Level of Security

- 256 bit [AES](#) encryption used for all CryptoHeaven messages.
- No third party keyholder. No key recovery or any other unauthorized access is possible. System is unbreachable by any snooping or government "authorities."
- Messages sent and received using CryptoHeaven servers do not route through mail servers on the public Internet like regular email. Both, the sender and the recipient exchange messages on CryptoHeaven secure servers. Messages composed by CryptoHeaven users are sent to the recipient's account without ever leaving CryptoHeaven Secure Data Center servers.
- CryptoHeaven is an excellent way to transmit sensitive information instead of using a fax. Fax is not a secure mode of communication.

Ease of Use

- It is very difficult for a small to midsize enterprise to effectively implement and manage an encrypted email system. CryptoHeaven solves this problem by managing the system for its clients.
- Users familiar with email and a web browser can use CryptoHeaven immediately.
- CryptoHeaven front-end user interface is easy to use to anyone with basic computer skills.

Low Cost

- Access costs are as low as \$2.42 a month for individual accounts. This is an extremely competitive price for a secure system.
- No hardware costs. CryptoHeaven manages the system for you. A server platform would cost you anywhere from \$4,000 to \$40,000 depending on the level of redundancy required.
- No personnel costs. Server administration personnel would cost you from \$50,000 to \$90,000 per year.
- No server license required. A server license would cost you anywhere from \$600 to \$4000 plus additional fees for each user.

Scalability

- CryptoHeaven can support as many users as required.
- Each user account may be purchased individually; group and multiple accounts are available at discounted rates.
- Accounts are upgradable to several gigabytes.

Whether you are a business or an individual subscriber, CryptoHeaven offers you a peace of mind that you deserve.

In addition to email security, you get the following additional services free of charge:

- [secure instant messaging](#)
